

CORSI E MASTERS

7-10 settembre 2010 - Tito Scalo (Potenza).

**AISA (Associazione Italiana per lo studio delle Argille) - X Corso Di Formazione:
“Diffrazione di raggi-X di sedimenti argillosi. Teoria ed applicazioni”**

Il Corso offre a quanti intendono acquisire, perfezionare le conoscenze sull'analisi per DRX di argille e minerali delle argille, una serie di lezioni teoriche accompagnate da altrettante esercitazioni pratiche in laboratorio.

Per informazioni scrivere a: scuolaisa@aipea.it

Settembre 2010 - Erasmus Mundus Master Course entirely devoted to Clay Minerals and their applications.

Deadline for scholarships application (students and academics) is: 30th April 2010 (on line applications only).

This International Master in Advanced Clay Science is an integrated 2 years master programme developed by five Universities: the University of Poitiers in France (co-ordinator), the Technical University of Crete in Greece, the University of Aveiro in Portugal, the University of Ottawa in Canada, and the Federal University of Rio Grande do Sul (UFRGS) in Brazil. It is supported by the French Clay Group (GFA) and AIPEA which are associated members of IMACS. This Masters Course is open to students holding a BSc (or a degree equivalent to 180 ECTS) or an academic equivalence based on professional experience (validation of acquired experience is required), and a fluent understanding of the English language.

This programme also offers short-term scholarships for Non European and European academics to carry out research or teaching assignments as part of the joint masters project.

CONVEGNI E GIORNATE STUDIO 2010

8 Aprile 2010 – Roma

CLAY DAY organizzato dall'AISA (Associazione Italiana per lo Studio delle Argille) - sede centrale del CNR (Piazzale Aldo Moro, 7), sala Il Pentagono

La prima parte del Clay Day vedrà due interventi programmati:

1. “La persistenza della Memoria: Le Argille e l'Origine della Vita sulla Terra” Enzo Gallori (Dipartimento di Astronomia e Scienze Spaziali, Università di Firenze)
2. “Minerali argillosi e batteri” Saverio Fiore (IMAA – CNR, Tito Scalo Pz)

Nella seconda parte sarà data la possibilità a tutti i soci di intervenire all'evento per presentare i risultati di ricerche specifiche ovvero le linee di ricerca del proprio gruppo di lavoro.

**6-11 Giugno 2010 - Madrid and Seville (Spain)
SEA-CSSJ-CMS Trilateral Meeting on Clays**

The Clay Mineral Society (CMS), the Clay Science Society of Japan (CSSJ) and the Spanish Clay Society (SEA) will hold a trilateral meeting in Spain in 2010 devoted to Clays and Clay Minerals. The aim of this 2010-Trilateral Meeting on Clays (2010TMC) is to offer a warm and friendly conference that will highlight innovative scientific and technical aspects of clays and related minerals.

The 2010TMC will begin with a one-day Workshop on Clays & Materials in Madrid followed by a Symposium on Sepiolite consisting of one-half day field trip to the Mg-clay deposits close to Madrid (i.e., sepiolite and smectites) and a Conference Session that will take place in Seville. The General Meeting will take place also in Seville, with a field trip to the Rio Tinto Mines area (SW-Spain).

21-27 Agosto 2010 - Budapest – Hungary
20th General Meeting of the International Mineralogical Association

Bonds and Bridges: Mineral sciences and their applications. Everything on natural and analogous solid matter and its interactions. Contributions are welcome from all fields of research and education related to mineral sciences and their applications, the latter including artistic and other social approaches as well.

25-29 Agosto 2010 – Budapest (Hungary)
5th Mid-European Clay Conference (MECC2010)

The Mid-European Clay Conference (MECC) was originally the joint conference of the national clay groups of Poland, Slovakia, Croatia and Hungary. The plan of joint meetings of the Mid-European clay groups was decided during the EUROCLAY Meeting in Kraków, Poland in 1999, and was supported by the European Clay Groups Association (ECGA). The aim of these bi- or triannual meetings is to promote co-operation and exchange of ideas among specialists of neighbouring countries.

26 Giugno - 1 Luglio 2011 - Antalya (Turkey)
EUROCLAY 2011

EUROPEAN CLAY GROUPS ASSOCIATION (ECGA). TURKISH NATIONAL COMMITTEE on CLAY SCIENCE

The Turkish National Committee has the pleasure of the organization of EUROCLAY 2011 Conference in ANTALYA and promises a technically stimulating meeting along with the warmest Turkish hospitality.

20-25 settembre 2011 – Bari (Italy)
4th International Conference on Medical Geology

GEOMED 2011

Geological and Medical Sciences for a safer Environment

On behalf of the International Medical Geology Association (IMGA), the Italian Chapter on Medical Geology and the Italian Association for the Study of Clays (AISA) we are pleased to invite you to the 4th International Conference on Medical Geology. The theme of the Conference, Geological & Medical Sciences for a Safer Environment, provides a unique opportunity for mineralogists, physicians, soil scientists, toxicologists, geochemists, veterinarians, biologists, chemists and for many other specialists to share ideas and knowledge on the impact of natural environment on health.
